

Unveiling the Crucial Steps in Managing Achondroplasia:

Diagnosis, Monitoring, and Early Treatment

This discussion will cover the coordination of specialist referrals, the critical importance of early diagnosis and treatment initiation, and the impact of pharmacotherapies on paediatric patients with achondroplasia.

Join Prof. Karin Blakemore, Prof. Janet Legare, Prof. Klaus Mohnike, and Carly Kutner, a multidisciplinary team of specialist obstetricians and pediatricians, and a parent of a child with achondroplasia, as they share their expert perspectives on managing achondroplasia.
